

Course Project Checkpoint 5

Andrex Ibiza

Based on my dataset, I determined that the expected flipper length (mm) for a penguin in this study is 201 millimeters.

Based on my dataset:

- The probability a penguin is the species Adelie is 0.442.
- The probability a penguin is the species Chinstrap is 0.198.
- The probability a penguin is the species Gentoo is 0.36.

I made no changes to the dataset this week.
